INFORMATION DISCLOSURE STATEMENT
U.S. Appln. No. 09/783,328

In compliance with the concise explanation requirement under 37 C.F.R. § 1.98(a)(3) for foreign language documents, Applicant submits the following explanations:

Taiwanese Patent Publication No. 302735 discloses that according to the game machine of the citation, basic game data is obtained by converting content data and so forth such as TOC data of CDs. Since it is extremely unlikely that content data happen to be the same among different recording medias, exchanging the recording medias can provide different base data every time the medias are exchanged. As a result, the content of games is not standardized. On the other hand, the present invention relates to a game device of a music-oriented type, which allows the use of a commercially available music information storage medium (such as a commercially available CD and so on) or a network distribution as a means for obtaining original data for game music.

The submission of the listed documents is not intended as an admission that any such document constitutes prior art against the claims of the present application. Applicant does not waive any right to take any action that would be appropriate to antedate or otherwise remove any listed document as a competent reference against the claims of the present application.

Respectfully submitted,
